

Sub D1 58

57. (New) A recording device for recording at least one of image data and voice data on a detachable recording medium comprising:

generating means for generating image data or voice data to be recorded;

retrieving means for retrieving information pre-recorded in the detachable recording medium for determining a file name;

file name determining means for determining a file name by combining a character and a serial number in accordance with the information retrieved from the detachable recording medium; and

recording means for recording, on said recording medium, a file including the image data or voice data generated by said generating means using the file name determined by said file name determining means.

59

58. (New) A recording device according to Claim 1, wherein the information pre-recorded on the detachable recording medium is information for determining a plurality of characters to be used for a file name.

60

59. (New) A method for recording at least one of image data and voice data on a detachable recording medium comprising:

generating image data or voice data to be recorded;

retrieving information pre-recorded in the detachable recording medium for determining a file name;

determining a file name by combining a character and a serial number in accordance with the information retrieved from the detachable recording medium; and
